EDUCATION

- 2021-2025
COOCH BEHAR GOVERNMENT ENGINEERING COLLEGE
 - B.Tech in Electronics & Communication Engineering
 - GPA : 7.75/10
- 2018-2020
KERANITOLA SHREESHREE MOHANANANDA VIDYAMANDIR
 - Higher Secondary- Science
 - Percentage : 81.00
- 2017-2018
KERANITOLA SHREESHREE MOHANANANDA VIDYAMANDIR
 - Secondary
 - Percentage : 80.26

SKILLS

- Maintenance: Preventive maintenance, breakdown maintenance, downtime reduction
- Electrical: SMPS, control panels, wiring, sensors, ADCs
- Machines: Solar PV stringer, soldering & heating systems
- Tools: Multimeter, MATLAB (basic), MS Office
- Programming: C, C++, Python
- Soft Skills: Troubleshooting mindset, teamwork, communication, time management, safety awareness

LANGUAGES

Bengali II English II Hindi

PROFILE

Electronics & Communication Engineering graduate with hands-on industrial maintenance experience in solar manufacturing and Indian Railways. Experienced in preventive and breakdown maintenance, electrical fault diagnosis, machine inspection, and control systems. Proven ability to reduce downtime, maintain quality standards, and support continuous plant operations. Strong troubleshooting mindset with a focus on safety and reliability.

WORK EXPERIENCE

- Gautam Solar Pvt. Ltd.** JULY 2025 - PRESENT
Graduate Engineer Trainee (GET) - Maintenance
 - Operate and maintain A050k Solar Cell Stringer Machine in PV module production.
 - Perform preventive and breakdown maintenance to ensure continuous production.
 - Diagnose and rectify electrical, sensor, soldering, alignment, and control faults.
 - Inspect heaters, soldering units, conveyors, and control panels.
 - Reduce machine downtime through routine checks and timely fault resolution.
 - Follow safety procedures, quality standards, and maintenance checklists.
- Indian Railways, Kharagpur Division** JUNE 2024 - AUG 2024
Trainee
 - Create and manage the marketing budget, ensuring efficient allocation of resources and optimizing ROI.
 - Oversee market research to identify emerging trends, customer needs, and competitor strategies.

PROJECTS

- Automated Railway Signal System** SEP 2024 - JULY 2025
 - Designed and implemented a bidirectional, Multi-sensor automatic railway gate system using ESP32 microcontroller, IR sensors, and servo motors to enhance railway crossing safety.
 - Developed state-machine-based embedded logic enabling timed gate closure, direction-specific detection, and automated signal light control (green, red, yellow, double yellow).
- Real-Time Ambient Gas Monitoring System** JAN 2024 - JUNE 2024
 - Designed and built an IoT-based gas and environmental monitoring system using ESP32, DHT11, and ADS1115 for accurate real-time sensing.
 - Integrated with ThingSpeak cloud for live data visualization, automated alerts, and historical trend analysis.
